Annual index

Volume 4

January to December 1974

Subject index

A

Abstracts of Annual IES Conference ... June–26
Aetna Actionshop ... July–50
American Ballet Theater on PBS ... July–51
Annual IES Conference supplement, New Orleans ... June–2
(Architect's perspective)
Winners and sinners '74 ... July–49
Winners and sinners in the energy crunch ... Apr.–12
Architectural lighting control system ... Dec.–36
Artemide ... July–55
Artpark Theater, Lewiston, N.Y. ... Aug.–21
Award of Distinction, London Stock Exchange ... July–4
Awards of Merit listing ... June–44

B

(Ballasts)
Fluorescent ballast, choosing a ... Dec.–18
(Behavior)
Color in luminous ceilings ... Jan.–41
Display lighting—the viewer's choice ... Jan.–47
Grading impressions and behavior ... Jan.–37
Lamps—their effect on social interaction and fatigue ... Jan.–51
Movements of people toward lights ... Jan.–54
Scaling luminous environments ... Jan.–56

C

(Ceiling systems)
Ceiling surfaces, who's responsible for—engineers or designers? ... Dec.–33
Central Savings Bank ... July–52
(Calculations)
Rules of thumb for mental lighting calculations, Part 2 ... May–56
Charles River Park Synagogue, Boston ... June–69
CIE Report No. 19—the prescription of interior lighting ... Jan.–12
CIE Report No. 19—a prescription for roadway lighting ... Feb.–38
(Competition entries)
Arkansas residence ... Jan.–33
Art gallery, Memphis, Tenn. ... Jan.–20
(Computer applications)
Artpark Theater, Lewiston, N.Y. ... Aug.–21
Automating point-by-point illumination and ESI computations ... Aug.–12
Large-scale computational system for lighting design ... Aug.–4
Luminaire selection and design—an alternative to manufacturers' catalogs ... Aug.–26
Univ. of Iowa's Hancher Auditorium ... Aug.–23
(Conference papers)
Color in luminous ceilings ... Jan.–41
Daylighting and energy conservation ... Oct.–27
Display lighting—the viewer's choice ... Jan.–47
Grading impressions and behavior ... Jan.–37
Lamps and lighting—a horticultural view ... Nov.–41
Lighting the nuclear generating station ... Nov.–36
Luminaire selection and design—an alternative to manufacturers' catalogs ... Aug.–26
Mercury lighting for a tunnel ... Sept.–40
Movement of people towards lights ... Jan.–54
Offset luminaire system—a new concept in roadway lighting ... Sept.–33
Ultraviolet and public health ... Oct.–34
(Controls)
Architectural lighting control system ... Dec.–36
Time controls—an historical review and quick guide to specifying ... Dec.–39
Cyclorama lighting, the far cyc approach to ... Dec.–24

D

Dakota Steel Co. ... July–48
Design practice, factors to be considered in lighting design ... Apr.–38
(DLF forum topics)
Summary of significant 1974 DLF activities ... Nov.–27

E

(Economics)
Lighting economics based on proper maintenance ... Aug.–6
(Education)
Better lighting with less energy ... Feb.–4
Branford open-plan school ... Feb.–6
College and university courses in illumination ... Feb.–32
Comfortable, economic, effective classroom lighting ... Feb.–16
HPS in a study lounge ... Feb.–36
IES footcandle levels ... Feb.–20
Lighting can turn on learning ... Feb.–10
Regional university concept ... Feb.–35
Saving energy in the classroom ... Feb.–29
Titusville, Fla., High School ... Feb.–26
Utility's approach, a ... Feb.–34
What today's schools need from the lighting designer ... Feb.–24
(Emergency)
A new code—a new ballgame ... May–4
Inverter systems ... May–15
Life Safety Code and National Electrical Code as related to emergency lighting ... May–4
Unit approach, the ... May–9
What's available in equipment ... May–6
(Energy)
Application of efficient sources ... Oct.–30
Better lighting with less energy, Scapoose High School ... Feb.–4
Daylighting and energy conservation ... Oct.–27
Energy: act or react? ... Oct.–4
Energy Advisory Committee Report ... Oct.–10
Energy—and our role as illuminating engineers ... Oct.–32
Energy at the crossroads ... Jan.–6
Energy conservation and luminaire dirt depreciation ... Dec.–30
Energy-saving tips for home lighting ... Apr.–40
Fluorescent lamps, krypton, and the conservation of energy ... July–10
Interior lighting based on resource optimization ... May–36
Looking ahead ... Oct.–13
New energy economics of lighting ... Oct.–16
Optimizing outdoor recreational lighting design ... Apr.–9
Preparing a lighting power budget ... Oct.–22
Saving energy and dollars ... Jan.–30
Saving energy in the classrooms ... Feb.–29
Winners and sinners in the energy crunch ... Apr.–12
Wise use of electricity for industrial lighting ... July–29

F

Factory lighting, economical redesign ... July–46
Finnish illuminating engineering ... June–64
Fluorescent ballast, choosing a ... Dec.–18
Fluorescent lamps, krypton, and the conservation of energy ... July–10

G

Garage lighting ... July–44

H

(Health care)
Applying system concepts for improved patient-care services ... Sept.–52
Branford "hospice" ... Sept.–50
Bristol, Conn., Hospital—dining room ... Sept.–12
Cedar Rapids' Mercy Hospital ... Sept.–7
Coney Island Hospital ... Sept.–64
Dental clinic—Dayton, Ohio ... Sept.–31
Design considerations for a surgery suite ... Sept.–28
East Los Angeles Hospital—child recuperation center ... Sept.–10
Hospital design update ... Sept.–56
How much light does a surgeon want? ... Sept.–4
If your patients happen to be people ... Sept.–23
Lowell General Hospital ... Sept.–16
Patient room lighting—an historical view ... Sept.–58
Patient service console system ... Sept.–21
Somerset Community Hospital ... Sept.–14
High pressure sodium lamps ... July–15
HPS and LPS—a primer ... Dec.–19
HPS for Brazil's Via Anchieta ... May–35
(Houses of worship)
Charles River Park Synagogue, Boston ... June–69
Elm Grove Lutheran Church ... June–54

I

(Industrial)
A look ahead ... July–36
Concrete block manufacturing facility ... July–47
Economical factory lighting redesign ... July–46
Highway garage lighting ... July–44
Lighting—its importance to the industrial visual environment ... July–25
Nuclear generating station, lighting the ... Nov.–36
Steel fabricating plant ... July–48
Western Die Casting plant ... July–45
Wise use of electricity, the ... July–29
Interior lighting based on resource optimization ... May–36
(International)
Finnish illuminating engineering ... June–64
HPS for Brazil's Via Anchieta ... May–35
London Stock Exchange ... July–4
LPS reduces crosswalk accidents in W. Germany ... Apr.–52

K

Kent concept, the ... Apr.–50
Krypton, fluorescent sources, and the conservation of energy ... July–10

L

(LDA—Award of Excellence)
Country Club, the ... Sept.–46
Department store drab ... June–51
Light from above ... June–54
Memorial park, a ... Sept.–43
Modern tennis club, a ... June–57
Small city's problem, a ... June–52
(LDA program)
Awards of Merit listing ... June–44
How to answer the criteria questions ... June–48
LDA program—some patience, please ... June–43
Program description and rules ... June–A
Light: What may be good for the body is not necessarily good for the eye ... July–41
Lighter side of lighting ... Dec.–42
Lighting—its importance to the industrial visual environment ... July–25
Lighting progress for 1974 ... Dec.–3
Lighting trends for '74 ... Jan.–17
Lighting trends for '75 ... Dec.–44
London Stock Exchange ... July–4
Low-pressure sodium lamps ... July–15
Low-pressure sodium lamps ... Dec.–19

M

(Maintenance)
Energy conservation and luminaire dirt depreciation ... Dec.–30
Lighting economics based on proper maintenance ... Aug.–6
(Marketing)
Lighting trends for '74 ... Jan.–17
Lighting trends for '75 ... Dec.–22
McGraw-Hill Bookstore ... July–49
(Merchandising)
Behaviorial lighting considerations in enclosed shopping environments ... Aug.–37
Shopping malls: lighting the inner spaces ... May–31
Store design—a retrospective ... Aug.–32
Titche's Town East store ... June–51
Miami Philharmonic Orchestra, a new home for ... June–60
Michael Two Restaurant ... July–52
Mirrors conceal sources at Sydney Opera House ... Dec.–28
(Museums)
Lighting glassware, Toledo Museum ... Feb.–42

N

New Orleans Annual IES Conference supplement ... June–2
New York Lumen competition ... July–49

O

(Offices)
Conference room, French Nat'l Railways ... Jan.–34
100 Williams St. ... July–50
(Outdoor)
Akron memorial park ... Sept.–43
Austin's moon-towers ... Apr.–47
Country Club, Ohio ... Sept.–46
Kimberly, B. C., urban renewal ... June–52
Mini park, Cleveland ... Apr.–7
New England Aquarium ... Apr.–28
Norfolk convention and cultural center ... Apr.–43
Optimizing outdoor recreational lighting design ... Apr.–9
Outdoor lighting by franchise ... Apr.–19
Titche's Town East store ... June–51

P

(Photobiology)
Lamps and lighting—a horticultural view ... Nov.–41
Ultraviolet and public health ... Oct.–34
Pot Au Feu Restaurant ... July–53
Progress Report for 1974 ... Dec.–3

R

(Residential)
Advancing the cause of residential lighting—a forum ... Nov.–22
Energy-saving tips for home lighting ... Apr.–40
Kitchen lighting ... Nov.–10
Lighting for an architect's residence ... Nov.–20
Lighting for the future ... Nov.–14
On the right track ... Nov.–6
Renovated firehouse offers unusual photo studio/residence ... Nov.–30
Track lighting for a small apartment ... Nov.–4
When a builder designs for himself ... Jan.–33
When a designer relights his own home ... Nov.–12
(Roadway)
High-mast interchange lighting, the Kent concept ... Apr.–50
HPS for Brazil's Via Anchieta ... May–35
LPS reduces crosswalk accidents ... Apr.–52
Mercury lighting for a tunnel ... Sept.–40
Offset luminaire system—a new concept in roadway lighting ... Sept.–33
Royal York Hotel ... July–54

S

Seagram Offices ... July–51
(Security)
Exterior security fence lighting ... Apr.–35
Facade lighting for nighttime security ... Apr.–23
Security lighting—an aid to community protection ... Apr.–32
Shopping malls: lighting the inner spaces ... May–31
Sodium discharge lamps ... July–15
(Sources)
Fluorescent lamps, krypton, and the conservation of energy ... July–10
HPS and LPS—a primer ... Dec.–19
Sodium discharge lamp ... July–15
Sources—today and tomorrow ... Jan.–23
(Sports)
Ice hockey rink, Olympia Stadium ... May–54
Modern tennis club, a ... June–57
Tennis court, Oakland, Calif. ... May–43
Sydney Opera House ... Dec.–28

T

(Theater/television/film)
Curve for theatrical dimmers ... Mar.–44
Cyclorama lighting, the far cyc approach to ... Dec.–24
Fisher, J.—an interview with ... Mar.–4
High-speed digital control system ... Mar.–14
How theatrical lighting influences architectural lighting design ... Mar.–10
Latest in sources ... Mar.–40
Lighting for closed-circuit TV surveillance ... Mar.–47
Lighting for mixed media ... Mar.–22
Lighting for multiform theaters ... Mar.–26
Lighting of lighting (photography) ... Mar.–33
Low-level lighting ... Mar.–31
Memory-assisted dimming ... Mar.–50
Miami Philharmonic Orchestra ... June–60
Mirrors conceal sources at Sydney Opera House ... Dec.–28
Morgan, R.—an interview with ... Aug.–16
Television contrast: A secret ingredient? ... Mar.–12
Updating the follow spot ... Mar.–54
Time controls—an historical review and quick guide to specifying ... Dec.–39
Times Square Theater Center ... July–54
Two Trees Office ... July–55

U

Univ. of Iowa's Hancher Auditorium ... Aug.–23

V

(Veiling reflections)
Applying veiling reflection factors to practical field use and measurement ... May–45
(Vision)
Light: What may be good for the body is not necessarily good for the eye ... July–41

W

Western Die Casting plant ... July–45
Wise use of electricity, the ... July–29
